DATA ANALYST | DATA QUALITY | OPERATIONS ANALYTICS

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in data analysis, data quality, data validation, ETL, data cleansing, transformation, and reporting. Skilled in analyzing structured and unstructured data, identifying patterns and anomalies, and improving data consistency using Python, SQL, Excel, Power BI, and AWS-based workflows. Experienced in data-intensive projects involving analytical reporting, data modeling, and data processing, with strong problem-solving and analytical skills.

TECHNICAL SKILLS

Data Analysis & Quality:

Data Analysis, Data Validation, Data Quality, Data Cleansing, Data Transformation, Data Modeling, Data Ingestion, Pattern Identification, Anomaly Detection, Reporting, Data Visualization

Programming & Databases:

Python, SQL, Java, MySQL, MongoDB

Analytics & Reporting:

Microsoft Excel, Power BI, Power Query, DAX, Pandas, NumPy, Matplotlib

Data & AI:

ETL, Machine Learning, NLP, Predictive Analytics, Sentiment Analysis, Text Classification

Cloud & Digital Tools:

AWS, Cloud-Based Data Workflows, Git, GitHub, Jupyter Notebook, VS Code

Core Skills:

Analytical Thinking, Problem Solving, Data-Driven Decision Making, Teamwork, Leadership

EDUCATION

Bachelor of Technology in CSIT (Cloud and Edge Computing) — KL University, Guntur, Andhra Pradesh | 2022–2026 | CGPA: 8.98

Intermediate (MPC) — Sri Chaitanya Junior College, Machilipatnam | 2020–2022 | GPA: 6.05

Matriculation (10th Class) — Narayana High School, Machilipatnam | 2019–2020 | GPA: 10.0

EXPERIENCE

Infosys Springboard Internship 6.0 | Artificial Intelligence / NLP | Nov 2025 - Jan 2026

- Developed an AI-based text analysis platform for processing and analyzing unstructured text data using Natural Language Processing.
- Performed data preprocessing, sentiment analysis, and text classification to identify patterns and extract analytical insights from textual data.
- Built and evaluated machine learning models using Python and analyzed model outputs to support data-driven analysis.

AICTE Virtual Internship | Data Engineering | Apr 2025 - Jun 2025

- Developed ETL workflows using Python and SQL for data extraction, cleansing, transformation, and ingestion from cloud datasets.
- Applied data modeling and validation techniques to prepare datasets for analytical use and improve data consistency.
- Worked with AWS and cloud-based data workflows to support data processing, transformation, and analytical requirements.

PROJECTS

DecisionIQ - AI-Powered Business Intelligence & Decision Support Platform

- Developed an AI-powered business intelligence application to analyze business data and generate dashboards, reports, and data-driven insights.
- Applied predictive analytics, trend forecasting, and anomaly detection to identify patterns and potential anomalies within business data.
- Transformed analyzed business data into structured reports and insights to support data-driven decision-making.

Sales Performance Dashboard - Power BI

- Developed an interactive Power BI dashboard to analyze revenue, KPIs, regional performance, and product sales.
- Used Power Query, DAX, and data modeling to transform source data and build dynamic analytical reports.
- Organized business metrics and visualizations to support structured performance analysis and reporting.

CERTIFICATIONS

- Red Hat Certified Enterprise Application Developer

- Salesforce AI Associate
- Microsoft Azure AI Fundamentals
